# (U) District of Columbia – Gun Thefts Spiked in 2016, Federal Report Says

(U) Washington – More than 9,200 firearms were stolen from federally licensed dealers last year, according to a new report from the Bureau of Alcohol, Tobacco, Firearms and Explosives. The figure represents a sharp increase from the year before -- up nearly 51%, from 6,163 firearms stolen in 2015 -- and continues a four-year uptick. Speaking to reporters Tuesday, agency officials stopped short of calling the trend an epidemic, but said the increases in stolen and lost firearms this year were "significant." Agency officials attributed the trend in part to emboldened criminals.

#### (U) Washington – Microsoft Releases Patches for Word Bug

(U) Redmond – Microsoft has stated that the bug in Word which was allegedly being used to try and steal banking logins will be patched. In a report, it has been stated that, the vulnerability is notable because it bypasses exploit mitigations built into Windows, doesn't require targets to enable macros, and works even against Windows 10, which is widely considered Microsoft's most secure operating system ever. The flaw is known to affect most or all Windows versions of Word, but so far no one has ruled out that exploits might also be possible against Mac versions. Researchers from security firms McAfee and FireEye warned that the malicious Word documents are being attached to e-mails, but didn't reveal the scope or ultimate objective of the campaign.
